PROJECTS

Integrated Excise Supply Chain Management System (IESCMS)

📅 07/2022 - Present   📍 Chennai, Tamil Nadu, India

A complex application management system designed to streamline the liquor excise supply chain process.

- Managed application workflows including product requests, approvals, and transport pass generation.
- Integrated RESTful APIs with Angular to process dynamic data for modules such as order pickup, dispatch, stock management, and sales tracking.
- Implemented features for payment deduction, refund processing, and returns, ensuring accuracy and reliability.
- Enabled real-time tracking and monitoring of stock movement across the supply chain from liquor manufacturing to retail shop sales.

HR Management System (HRMS)

📅 02/2024 - Present   📍 Chennai, Tamil Nadu, India

A versatile HR and company management system aimed at improving internal processes and employee management

- Developed a React.js based HR Portal and Company Management System with modules for employee registration, attendance, leave, project and task tracking, and online meetings.
- Designed and implemented responsive UI components with React, integrated RESTful APIs, and applied state management (Redux) for real-time updates.
